I'd like to apologize...

To all those customers and clients that called regarding the hosting services announced in March I wish to offer you my apologies.

The technology company that I partnered with to offer those services fell extremely short in their promises to me, and consequently, in my promises to you.

The problems lay in the ability to give each of you complete control over your hosting accounts.

I am still examining alternatives, but in the meantime please do not hesitate to call if you are still in need of a recommendation of a hosting company. Also, if you're switching hosts don't forget about our e-Moving services.

I look forward to hearing from you!
